I'm a Finnish Full-Stack Developer with a proven record of delivering web applications built on strong design principles. I specialize in turning concepts into functional, visually refined digital products. I'm bilingual — fluent in Finnish and English.

WORK EXPERIENCE

 KPMG Finland	2023-2025
Senior Software Developer Built AI-powered internal tools, improved CI/CD pipelines, and modernized frontend systems with React, Next.js, and Azure. Enhanced the company's design system and component library for better scalability and consistency.	2 months
Junior Software Developer Developed a new component library and redesigned the internal design system using Figma and React. Contributed to AI-driven product development and supported cloud-based deployment workflows.	2 years 9 months
